

JN CHEVROLET

PROJECT PROFILE

Client: JN Chevrolet

Location: 2780 Waiwai Loop, Honolulu, HI 96819

Project Duration: January 2025 – March 2025

Project Manager: Jason Simms

Contractor: R & C Roofing

Project Objective

To remove the existing failed coating from the upper deck area and install a 10-Year liquid-applied vehicular system. Recoat the existing system in the ramp area to restore integrity and performance.

Owner Goals

- Long-term vehicular protection
- Restore structural integrity of a severely deteriorated deck
- Overcome design challenges that had deterred other manufacturers and contractors

Key Challenges

- Extensive structural cracking and concrete deterioration
- Severely damaged substrate – described as "the worst deck I have ever seen"
- Multiple vendors declined the project due to complexity and risk

AVM Solutions Delivered

- AVM Epoxy Primer 401 FC: Fast-cure adhesion promoter for rough, unstable substrates
- AVM System 620: Durable, traffic-grade liquid coating designed for high-performance vehicular surfaces

Value Delivered

- A high-performance, warrantied waterproofing system tailored to extreme conditions
 - Structural rehabilitation without full deck replacement
 - Confidence in AVM's field-proven systems and expert technical guidance
