AVM Industries, Inc.
8245 Remmet Ave
Canoga Park, CA 91304

To whom it may concern,

Thank you for your inquiry regarding our SDS and the OSHA HCS 2024 updates. Here is the clarification regarding your questions:

1. Proprietary Mixture and OEL Status

For the "Proprietary Mixture", we have verified with our raw material supplier that it contains no hazardous substances and no ingredients that exceed Occupational Exposure Limits (OEL). Therefore, it does not require a hazard classification or "Trade Secret" hazard listing on your end.

2. OSHA HCS 2024 Component Ranges

To comply with the new OSHA HCS 2024 prescribed ranges, the composition listed in Section 3 of our current SDS translates to the following:

Polyethylene (CAS 9002-88-4): (M) 80% to 100%

Proprietary Mixtures: (C) 1% to 5%

If you have any further questions regarding this matter, please do not hesitate to contact our technical support team.

Thank you.
